Fraser Metzger a unanimous call to be installed over the church and voted to advance his salary from \$25 per week to \$30 and the use of the parsonage. It is understood that Mr. Metzger had received other calls from different places and this action of the church will no doubt cause him to refuse these datterings offers and remain here for the present. ### GOLD COINS.

Why Bankers Don't Like Them and Prefer to Handle Paper.

"Of the different kinds of American money now in circulation the gold coins of all denominations are the most disliked in my business," said a prominent New York banker.

"Take a greenback, a silver or a gold certificate or a national bank note to your bank and it is received and placed to your credit without a moment's delay. Not so with gold. A few days ago a gentleman brought to our bank upward of \$3,000 in gold of different denominations and was much provoked because we would not receive it and give him credit with the amount the face of the coin represented. This we could not do because the law requires that gold shall be redeemed only at its actual value. Coins carried in the pocket for any length of time naturally lose something by abrasion—probably but a fractional part of a cent on a ten dollar piece, but it is a loss nevertheless—and therefore bankers cannot give credit for gold deposits until the coin shall have been weighed. In the case mentioned my friend took his gold to the subtreasury and was compelled to wait there nearly an hour before he could get notes for it.

"Every coin had to be passed through the scales, and after the weighing process had been completed three of the coins—two five dollar pieces and a ten dollar piece—were returned to him as short in weight. Before returning short weight coins the department stamps on the face of each coin a cross. The owner is either left to send the coins to the United States mint for redemption or again put them into circulation. Eventually the coins with crosses on their faces will go to the mint and be redeemed as their actual value. In many instances there may not be more than several cents' shortage on \$50 worth of coins. Business men, however, naturally object to the inconvenience and get rid of their gold as fast as possible."—New York Press.
